

TREASURY WINE ESTATES

12 October 2017

MEDIA STATEMENT

Treasury Wine Estates update on fires in Northern California

TWE is continuing to focus on ensuring that all of our employees are safe and accounted for, with the continued changing conditions in the region.

At this stage, the great news is we can confirm that the Stags' Leap Winery and cellar door, including the Manor House, were not damaged by the fire and the infrastructure remains intact. Additionally we are able to share that Chateau St. Jean sustained only minor damage to an out-building, with cosmetic and landscaping damage.

Our cellar doors and wineries are currently closed, and will remain closed until we are sure they can safely open again.

We are grateful for the outstanding efforts of the first responders and crews facing the fires, and we wish for their safety. Our thoughts are with the Napa and Sonoma communities that have been impacted.

As shared in a previous statement, the majority of TWE's vineyards and wineries are not presently in the direct fire zones.
